Claims 6, 8, 11 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are improper multiple dependent claims. Thus they will not be further examined on their merits.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 10 are rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art (instant pages 1 and 2 and Figure 1).

The outer surface of the inner tube G,G' and the inner surface of the outer tube E have substantially the same shape and thus act as reference elements for one another, "reference elements" being a very broad term.

Claims 2-5, 7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly the applied art, discloses or teaches a reference body bearing on an edge of the tube arranged at the other housing; nor through passages in which a fixation body can be fixed; in combination with the rest of the subject matter of the respective independent claim.

The other references cited on Form 892 disclose similar starter housings.
